Holding SV CERTIFICATION SAGL:

Cama, Via Al Foss 31 – 6557 (GR) – Svizzera

Accreditation Site - SV CERTIFICATION SRO:

Via Karadžičova 8/A, Bratislava – Slovacchia

Italian Site:

Senna Comasco, Via Pietro Ponisio, 1 – 22070 Senna Comasco (CO)

The beginning of a journey that has gone beyond the borders of Europe

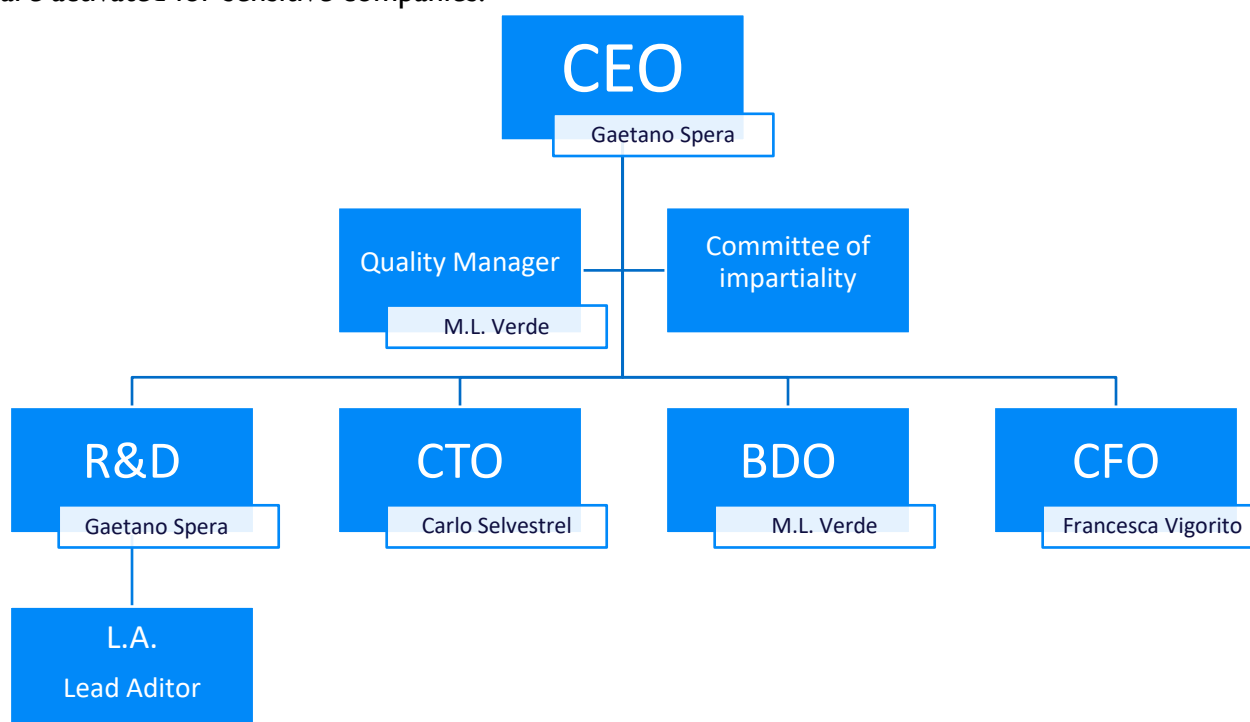

In 2010 the SV auditing company group was founded by the current partners, which was among the first Italian companies to act exclusively as outsourcing for certification bodies. In 2013, SV then developed a project for the internationalization of the SV CERTIFICATION brand to bring its concept of the Business System to other European countries. Since 2014 there are many certification bodies that have embraced our project by entrusting us with international mandates.

In 2014, the Swiss company of the group was founded with the international impartiality committee and the IT division, initially created to protect the data of our customers in the Swiss Confederation and then becoming strategic for audits at multinational companies in the IT sector.

In 2018 the members decide to directly accredit the SV as a Certification Body, and at the same time open their services to the rich markets of the East, therefore the new headquarters in Bratislava was born, the first to be accredited by SNAS (Slovak Accreditation Body). Thanks to the contribution of new partners, SV arrives in South America, in particular in Brazil. In 2020 the turning point with direct contracts with multinationals in the medical device, logistics and IT sector.

To date SV manages audits for multinational companies, companies in the construction sector and public bodies, with its network of auditors it carries out its services in Europe, Asia and America.

Its policy is increasingly aimed at certifying excellence in various markets rather than expanding a particular market and this has allowed SV to expand on different continents and strengthen the corporate image with references of the highest profile. All the IT data of the group are stored on Swiss servers and highly secure data communication methods are activated for sensitive companies.

SV Certification Group provides part II and III audits in the field of quality, environment, energy and safety.

Our slogan is “Value added audit”, it means:

- offer added value to the customer during audits on schemes such as those of quality, environment and safety or other sector specific schemes;
- evaluate the right and independent skills with respect to the processes to be to verify;
- detect and report real data on the state of compliance with voluntary standards and mandatory keeping sensitive information confidential;

verify the degree of alignment of suppliers with the client's policy

Draw up and sign a report aimed at improving performance, raise the level of transparency

SV Certification sro, is the certification body based in Bratislava, owned by the Group that has received accreditations on the following Management System schemes:

ISO 9001 Quality management systems
ISO 14001 Environmental management systems
ISO 45001 Occupational Health and Safety Management Systems
ISO/IEC 27001 Information Security Management Systems
EN 16636 Pest Management

For all specific certifications in the food sector, joint audits are planned with NSF International, the US certification body, world leader in food certifications.

Energy certification schemes are planned jointly with our accredited partners.

For CE Markings joint audits are held with the Notified Bodies chosen on the basis of the country and the availability of test laboratories.

Our flexible structure allows us to follow SMEs and multinationals, guaranteeing an auditing service at the highest levels and commensurate with the size of the company.

Our customers therefore include small construction and mechanical companies together with multinationals in the medical, transport and food sectors. Thanks to the multilingual approach of our auditors, it is possible to plan audits all over the world in a short time, and in those areas where the departments have different locations and different languages.

One approach consolidated:

"Audit is the tool by which an organization can evaluate the status and continuous improvement of its processes"; the report must therefore be: "Clear, complete and suitable for those who have to accept it"

Public Administration:

"SV CERTIFICATION also works in partnership with the Public Administration for the control of compliance in joint ventures/strategic suppliers. Our auditors have knowledge of public contracts and related legal obligations".

SV CERTIFICATION is a member of SNV (Swiss Association for standardization)
